parameter_sweeps
name, description
param_ranges (JSONB)
objective quantity, goal
datasets linked via sweep_datasets
1:n
sweep_suggestions
suggested_params (JSONB)
method: sobol | lhs | random |
gp_uncertainty | gp_ei
score, used, dataset_id
n:m
datasets
id (uuid), name (unique)
dataset_type (schema id), status
parameters (JSONB), metadata (JSONB)
tags[], notes, fts_vector
allowed_orgs[], allowed_groups[]
uploaded_by
started_at, finished_at
schema_hash
1:1
param_vectors
vec vector, keys[]
schema_hash
1:n
field_embeddings
part_id, field_name, n_points
embedding vector, n_components
explained_var
1:n
dataset_parts
part_index, label
metadata (JSONB)
files
part_id, file_class (schema id)
relpath, filename, object_key
size_bytes, sha256
time_value, metadata (JSONB)
quantities
part_id, name (schema id)
value, unit, source
optional
identity, access and audit
datahub_users: role, organisation,
bcrypt hash
datahub_groups, group_members
(is_manager)
share_links: token hash, expiry,
download limit, revoked_at
user_sessions, download_logs
(no grants for the anon role)
